

July 21<sup>st</sup>, 2021

## Notice of production delays for 1 HP to 3 HP induction motors:

With the recovery of the global economy and manufacturing industries as more and more countries recover from the COVID-19 pandemic, in addition to the increased demand of our GTR products, serious shortage of raw materials (notably specific plastics and metals) are now seen worldwide due to increased demand in other manufacturing businesses.

Despite efforts to increase the production capacities at Nissei Corporation, we are experiencing shortage of specific parts for our induction motor line-up.

We would like to place notice to all of our dear partners and customers regarding the potential delays of orders involving the below lineup:

### Targets and Details:

#### 1. Target Models:

- |                          |                      |
|--------------------------|----------------------|
| ○0.75kW (1 Horse power ) | 3 Phase gear motors  |
| ○1.5kW (2 Horse power )  | 3 Phase gear motors  |
| ○2.2 k W (3 Horse power) | 3 Phase gear motors. |

#### 2. Affected order time frame:

- Orders placed from today (July 21<sup>st</sup>, 2021) up to October 31<sup>st</sup>, 2021.

※Nissei corporation shall announce updates on this matter once available.

For any questions or more details, please contact your local service office or representative.

We are terribly sorry for the inconvenience.
